

How Long Does a Coinbase Refund Take?

The time it takes to receive a refund from Coinbase varies depending on the type of refund, the payment method used, and the complexity of the investigation. For refunds related to unauthorized transactions or account compromises, Coinbase typically completes its investigation within 7 to 15 business days. Once approved, the actual return of funds to your bank account or card takes an additional 3 to 7 business days. For refunds due to double charges, incorrect fees, or technical errors, the investigation process is usually faster—often 3 to 5 business days—with another 2 to 5 business days for the funds to appear in your account. If your refund involves a crypto transaction that was reversed, processing can take up to 10 business days. For the most accurate timeline regarding your specific refund, call 1-888-612-5316 directly for an update. Refunds to debit or credit cards generally appear within 5 to 10 business days after approval. Refunds to bank accounts via ACH transfer typically take 7 to 14 business days. If you requested a refund for a deposit hold that was released, funds may appear within 3 to 5 business days. Delays can occur if your bank processes refunds slowly or if additional verification is needed. If your refund has not arrived after the expected timeframe, do not wait indefinitely. Call 1-888-612-5316 to have a support agent check the status of your refund and trace the transaction. Always have your refund confirmation number or case ID ready before calling. For the fastest possible refund processing, ensure your payment methods are verified and up to date. For any refund delay or status inquiry, call 1-888-612-5316 today.
